Sprint Report 2
SEADS Project

Things we can do better/ ways to fix it
- have more efficient meetings
    - don't get off topic
    - use stakeholders time more wisely
    - keep side discussions to a minimum
- have more frequent daily standups
    - commit to coming in 3 times a week to meet in person
    - meet more often in general
- better organization of tasks
    - have more tasks
    - break up user stories into more detailed tasks

Things we are doing well:
- weekly meetings with stakeholders are very beneficial
- making slow but steady progress
- following existing code conventions (Django, pep8, etc)
- documentation of work is good

Work that was completed:
- No user stories were captured this sprint however tasks of those user stories were completed
    - Considerable progress was made in cleaning up existing codebase and converting Django backend to a much more re-able format that complies which Django standards
    - Work towards data classification and visualization was completed
    - Work towards getting an API up and running was also completed
    - Complete user login and device registering

Burndown:
